TECHNICAL SKILLS

Javascript (6 years of project experience) | TypeScript (3) | React (5) | NextJS (3) | Redux (4) | Material UI (4) | HTML (6) | CSS/SASS (6) | tailwind(1) | Bootstrap (4) | NodeJS (2) | ExpressJS (2) | Rest APIs (4) | MongoDB (3) | MSSQL(4) | POSTGRES (1) | AWS (Lambda, S3) (2) | Jest (3) | React Testing Library (2) | Python (2) | C# (2) | Docker (1) | Git (5) | Agile Methodologies (5)

WORK EXPERIENCE

03/2023 – Present

Senior Frontend Engineer

Token Gmbh, Berlin, Germany

Project: Token Gmbh - Token.io's A2A payment infrastructure harnesses the potential of open banking and is designed to cater to the payments sector. I was a member of the team responsible for the platform's core product, which efficiently handled transaction processing. With extensive coverage, spanning 567 million bank accounts across Europe (encompassing over 80% of bank accounts in each of its 16 supported markets), Token.io proudly offers the most robust connectivity for A2A payments, guaranteeing a seamless integration of this payment method across all channels and devices.

Technologies used: React | NextJS | JavaScript | TypeScript | Redux Toolkit | Tailwind CSS | Java | AWS | Docker | Github Actions | Agile | Scrum | Jira | Git | Firebase.

01/2022 – 02/2023

Senior Frontend Developer

Felmo Gmbh, Berlin, Germany

Project: Petmin - A CMS platform to overlook all the operations by Vets, TFA, Courier and Admins. I am part of the agile team of 12 people responsible for maintaining and adding new features to Petmin. Petmin is a data intensive platform. The platform is built using React(Typescript), Laravel and MySQL, and deployed using Github Actions.

Technologies used: React | JavaScript | TypeScript | Redux Toolkit | SCSS | Laravel | MySQL | Docker | Github Actions | Agile | Scrum | Trello | Git | ECS.

08/2020 – 12-2021

Team Lead

Zeki Expert Solutions, Islamabad, Pakistan

Project: Life Quote Tool - a sales platform for American insurer SelectQuote used by 1k+ agents to sell the insurance policies for 50+ insurance carriers in the US. I'm leading an agile team of 5 developers, working on migrating the company's legacy flagship product to a web app with an interactive UI using React, Redux and Node.js. Refactored/Monitored 100+ reusable components from class to functional components, optimized 10+ APIs to boost the performance of the app. Most importantly, I developed the payment feature which reduced client process time by 60%. Developed a new email integration system using Node and AWS S3 which eased the

communication with clients. Using AWS Lambda for database synchronization. I work on the overall UX and UI and implement pixel perfect UI on the web app. Responsible for writing clean code with industry best practices, conducting daily stand-ups, implementation of all the new features and resolving bugs. **Technologies used:** React | JavaScript | TypeScript | Redux | Material UI | CSS | React Query | NodeJS | ExpressJS | Sequelize ORM | MSSQL | MariaDB | AWS Container | Docker | AWS Continuous Deployment Pipeline | Agile | Scrum | Jira | Bitbucket | Confluence.

11/2016 – 08/2020

Full Stack Web Developer

Nested Logics, Islamabad, Pakistan

Project: Camero - a video-sharing app (like Cameo), which streamlines communication between celebrities and the public. The app allows celebrities to send personalized video messages to fans. I worked in an agile team of 4 developing this project from scratch using React, with a live chat feature using socket.io, Stripe integration and deployment through Firebase.

Project: Securacy - a cloud-based SaaS enterprise platform which simplifies operational management processes of maritime security industry stakeholders, enhancing their internal communication and external service supplying capabilities. Securacy has revolutionized the way maritime security works with its automated management solutions, enabling all relevant stakeholders to connect with each other in a single place. The quality of services provided by the stakeholders will be reflected and rewarded by the apps rating system which increases healthy competition by motivating all the parties to keep on improving the quality of their services. I work on the overall UX and UI and implemented pixel perfect UI on the web app using React, Redux and Material UI.

Project: I was responsible for developing 100+ modern, fully responsive UI pages using React, HTML5, CSS3, Sass, Bootstrap for different multinational clients. Focused on layouts that are cross-browser compatible & supported by all major browsers across devices. Significantly improved page loading speed for our main client's website, UX flows, design and implementation, React and Redux architecture. Implementation of RESTful APIs for different mobile applications. Extensively used GIT for version controlling and regularly pushed the code to GitHub/Gitlab. **Technologies used:** React | JavaScript | JQuery | HTML | CSS | Bootstrap | Redux | Material UI | C# | .NET Framework | Rest APIs | Git | Trello

EDUCATION

11/2012 - 10/2016

Bachelor of Science in Software Engineering
University of Engineering and Technology, Taxila, Pakistan

ACHIEVEMENTS

2020

Promoted as Team Lead in span of 6 months at Zeki Expert Solutions

2016

Represented my Uni at Jinnah Convention Center at a Startup Expo

2015

President of Rashid Cheema Blood Donation Society, Taxila Chapter

2015

Ambassador of PsiFi Science Olympics in Lums by LUMS SPADES

LANGUAGE SKILLS

English (C2) | Urdu (C2) | Punjabi (Mother Tongue)

HOBBIES

Hiking | Travelling | Cricket | Football

A handwritten signature in black ink, appearing to be 'Asmit', written in a cursive style.
